

Data Consent and Privacy Policy

Thank you for participating in our urban cycling research by using the crowdsourcing platform. Your privacy and the security of your data are very important to us. Please read the following policy carefully to understand how we handle your data. By using the platform, you agree to the terms of this Data Consent and Privacy Policy.

Purpose of Data Collection

The purpose of this research is to understand urban cycling experiences and infrastructure needs by collecting data from cyclists in real-world conditions. This includes analyzing bike lanes, road conditions, and interactions with other road users to help improve cycling infrastructure.

Types of Data Collected

When using the platform, the following types of data will be collected:

- **Video Data:** Optional video recordings of your cycling route, capturing visuals of the road and surrounding environment.
- **Geospatial Data:** GPS tracking data (e.g., location coordinates, timestamps) to map your route in relation to urban infrastructure.
- **User-Provided Feedback:** Optional input about your experiences, such as reflections on navigating certain routes, challenges encountered, feelings of safety or comfort, and observations about road conditions or infrastructure quality.

Use of Data

The data collected will be used strictly for research and analytical purposes, specifically to:

- Generate insights into urban cycling safety and infrastructure needs.
- Build a dataset of urban cycling conditions for use by researchers and policymakers.
- Inform urban planning decisions to support safe and accessible cycling environments.

Data Sharing and Publication

- **Aggregated and Anonymized Data:** Your data will be anonymized and aggregated with data from other users before any analysis or publication. Individual users will not be identifiable in any published findings or reports.
- **Research Collaborators:** Anonymized data may be shared with research collaborators or public planning agencies for the purpose of enhancing urban cycling infrastructure.

Data Security and Storage

- **Data Encryption:** All data collected from the platform will be encrypted during transmission and stored on secure servers.
- **Data Retention:** Data will be retained only for as long as necessary to fulfill the research objectives and meet any legal or regulatory requirements. Following the conclusion of this research, identifiable data will be deleted or anonymized in full.

Your Rights

You have the following rights concerning your data:

- **Access:** You may request to view the data we have collected from you.
- **Correction:** You may request correction of any personal data you believe is inaccurate.
- **Withdrawal of Consent:** You may withdraw your consent at any time by contacting us. Upon withdrawal, your data will no longer be used, and we will delete any personally identifiable information associated with your data.

By using the platform, you acknowledge that you have read, understood, and agree to this Data Consent and Privacy Policy. Thank you for helping improve urban cycling infrastructure through your participation.
