Research Title	To Predict Is To Believe: Integrating Content, Context, and Creator Features For Pre-Publication Short-Form Video Engagement Prediction
Proponents	Ana Victoria R. ANGAT Abram Aki R. BUKUHAN Ethan Axl S. BURAYAG Joshua James B. ESLETA

Revisions	PDF Page #
1. Abstract: ▪ Sharpened the exact novelty of the research	3-4
2. 1.1 Background of the Study ▪ Rephrased the research question to “How does integrating creator-related and contextual features alongside multimodal content signals improve pre-publication engagement prediction accuracy for short-form videos?”	11
3. 1.2 Research Objectives ▪ Enumerated the specific objectives as one sentence per objective ▪ Rewrote objectives to not read like a methodology	11-12
4. 1.3 Scope and Limitations of the Research ▪ Scoped the types of videos to focus on specific lengths, genres, and topics ▪ Stated that the current features are only initial features and that other features may be added ▪ Added that the model will be compared against other models ▪ Organized scope and limitations to follow the 1:1 mapping with the specific objectives	12 12 13 12-13
5. 1.4 Significance of the Research ▪ Speculated on the positive outcomes from different perspectives	13-14
6. 2. Related Works ▪ Deepened the information per thematic area	17-18
7. 3. Methodology (indicate only those that address the panel’s suggestions/questions) ▪ Added an overview of the methodology	23

▪ Detailed the recruitment strategy and established the minimum target for content creators and data points.	24
▪ Specified the exact data variables to be extracted from donated TikTok archives to clarify the scope of the data donation.	24
▪ Replaced the summary table with a procedural figure and added supporting paragraphs to explain each methodological step.	24-25
▪ Added an ethical consideration regarding the privacy of people's faces	25-26
▪ Rewrote methodology to add leeway in the data representation and the model pipeline	25, 27
▪ Removed the specific statistical tests	30
